

Slushy Machine

Church events, fairs, sporting events, school carnivals, graduations, birthday parties, and family gatherings will benefit greatly from the use of this slushy machine. The dual bowl machine produces more than 75 – 8 oz. cups of frozen iced drinks. An illuminated sign will attract potential customers to get their hands on the frozen treat.

Operation:

1. Lift the lids slightly for the selected hopper and slide back to gain access to the hopper.
2. Place the pre-mixed liquid product in the selected hopper.
3. Press and release:
 - a. Switch "1" to power on the dispenser.
 - b. Switch "2" to start the left auger motor.
 - c. Switch "3" to select ICE to begin the cooling process for that hopper.
 - d. Switch "4" to start the right auger motor.
 - e. Switch "5" to select ICE to begin the cooling process for that hopper.
 - f. Do not press any of the switches designated "6" as these are used for programming the machine for different cycles.
4. Wait for the liquid to freeze to the desired consistency.
