

# Sno-Kone Machine

Amusement parks, fairs, sporting events, school carnivals, graduations, birthday parties, and family gatherings will benefit greatly from the use of this ice shaver snow cone machine. The machine produces up to 500 pounds of shaved ice per hour, and comes with stainless steel blades that shave the ice to the desired consistency. An illuminated sign will attract potential customers to get their hands on the frozen treat.

## Operation:

1. Fill the hopper to within an inch from the top with ice cubes or block of ice (no larger than 3 to 4 inches). The larger the pieces, the better the snow.
2. Switch the motor on and push the "Motor Run" Button. Wait for it to reach full speed.
3. Press the pusher handle down against the ice in the hopper. Apply firm and even pressure.

Note: Never allow any foreign or metallic objects around the shaver area of the Sno-Kone Machine. Ice picks, scoops, and debris that may be in the ice often damage blades.

## Rental Policies:

- Customer is allowed 3 days of use.
- Special rental rates apply for rentals over 3 days. Please call for prices.

Delivery & pickup is available, upon request. Please call for rates.
